---

Barry, Thanks for providing this information. Regarding the Upper Cement Creek TDD - were you planning to submit the draft document, references, and maps next week? I would like to see what shape the document is in.

Also, I noted on my calendar that you have vacation scheduled from February 10-20. If I need anything done, and a TDD mod is needed, I will do the mod, but who will be backing you up?

Another question, regarding the documentation of the American Tunnel blowout; are you referring to the 1978 blowout?

Sincerely,

Sabrina Forrest

Subject: Status of 3 Upper Animas Mining District/Cement Creek jobs and Schwartzwalder Mine wetlands delineation job

---

**TDD 1108-04**

**Schwartzwalder Mine**

The final report has been completed and distributed and the final invoice from Toeroek has been received. The total budget after Amendment A is \$23,500.00 and current expenses are at \$23,000.00. No additional work beyond reporting and closeout will be performed on this TDD.

**TDD 1008-13****Upper Animas Mining District**

The final report has been completed and distributed. The total budget after Amendment C is \$142,900.00 and current expenses are at \$142,899.88. No additional work will be performed on this TDD

**TDD 1106-05****Upper Animas Mining District**

The final wetlands delineation report has been completed and distributed. The total budget after Amendment A is \$85,800.00 and current expenses are at an estimated \$86,786.97. The budget has been exceeded by approximately 986.97. The final invoice from the wetlands delineator has been received, but the exact costs have not been calculated. The extra costs accrued to this job were the result of extra time spent reviewing the final draft wetlands report and making suggestions to insure that the language and conclusions of the report supported the HRS document scoring needs. The revised QuickScore 3.0.3 will be forwarded to EPA this week. No further work is anticipated on this TDD at this time. START does request consideration of an amendment to the TDD to cover the additional effort expended in January.

**TDD 1111-09****Upper Cement Creek**

The HRS Document is in the final stages of preparation. Not all of the maps for the document are complete, but should be completed next week. The total budget is \$38,000.00 and current charges are at 32,005.68. The 90% expended level will be reached next week and work on the TDD will stop at that point until the TDD status is reviewed. Remaining tasks include documentation of the American Tunnel blowout, production of final document maps, and preparation of references to be presented in electronic format.
